PROJECT Due Diligence

DESCRIPTION

Abricon prepared a Vendor Environmental Due Diligence Audit (VEDDA) report describing and evaluating the Environmental, Health and Safety (EHS) issues related to the company's potential interest in site redevelopment. The work included a pre-audit review, a site reconnaissance and an asbestos assessment. The final report presented a balanced account of EHS compliance and risks summarising likely remedial activities required pre-divestment, to maximise asset potential, and range estimates for the likely timescale and expenditure required for each activity.
