## Due Diligence Audit, Hazardous Waste Operations

**CLIENT** Confidential  
**LOCATION** UK  
**DATE** 2004  
**PROJECT** Multi-site Due Diligence

### DESCRIPTION

Abricon carried out multi-site EHS due diligence audits for hazardous waste incineration facilities. Abricon's role in this project was to support a US consultant in technical, environmental and regulatory issues. The work included a detailed review of information made available in a data room, a regulatory review as well as a visit to the key sites. A template was developed to present the large amount of data and information in the most appropriate manner. The project concluded with a final report detailing the potential environmental risks and the potential costs associated with them.
