

Compliance & Business Improvement

IPPC Application Support, Electronic Components

CLIENT	Confidential
LOCATION	Dorset, UK
DATE	2002 - 2003
PROJECT	Environmental Site Assessment (ESA) , Phase 1 and 2 and support to obtain an Integrated Pollution Prevention and Control (IPPC) authorisation for a company manufacturing electronic components

DESCRIPTION

Abricon initially carried out a Phase 1 ESA as part of due diligence investigations for the acquirer of the site. Subsequently the new management requested Abricon to assist the company to obtain an IPPC authorisation for its operating processes. An invasive Phase 2 ESA was carried out to enable the client to prepare a baseline contamination report as part of the Site Report required to submit a permit application. Subsequently Abricon provided assistance to the client to carry out a review of BAT (Best Available Techniques) applied at the site to minimise releases to all three environmental media (again to support the IPPC application). Total value of work required was of the order of £20,000
