

## Energy and Resource Audit and Survey Services

Have you ever wondered whether your business is achieving the best out of its resources? Like many people, you probably know that it isn't, but you lack the time or the manpower to get on top of the issues.

Abricon can help. We have a team of qualified and experienced energy and resource management professionals on hand with experience of your industry, process or building type.

Our energy and resource audit and survey service can offer you a range of options, from a quick "walk-through" survey and brief report on the salient points to a full energy audit with instrumented monitoring of key energy users.

### Other services available include:

- Performance benchmarking
- Technology-specific reviews, for example:
- Combined heat and power (CHP)
- Refrigeration
- Compressed air
- Motors and drives
- Lighting
- Heating, ventilation and air conditioning (HVAC)
- Energy metering and monitoring and targeting (M&T)
- Training and awareness in energy and resource issues
- Water management audits and surveys
- Waste management audits and surveys
